WORK EXPERIENCE

AI Software Developer

June 2024 - Present

JSI Telecom | Ottawa, ON

- Developed AI applications in Python and Java, leveraging Triton-served models for vision and language analytics with vectorized content.
- Built FastAPI backend services using the Agno agentic framework and vLLM for LLM-powered content analysis and detection.
- Refactored model inference pipelines, improving efficiency to achieve 3× higher throughput.
- Designed and implemented CI/CD pipelines with GitHub Actions and automated Helm tests, improving code quality and deployment reliability.
- Containerized and deployed backend applications and model services on Kubernetes, managing container images, Helm charts, and release workflows.

Software Developer (Co-op)

Sep 2022 - Dec 2022, May 2023 - Dec 2023

JSI Telecom | Ottawa, ON

- Contributed to feature development for web applications and backend services within Agile teams.
- Built Angular components, services, and modules, and led the migration of about 250 end-to-end tests from Protractor to Cypress, improving test reliability and maintainability.

Application Developer (Co-op)

May 2022 - Aug 2022, Jan 2023 - Apr 2023

Infrastructure Canada | Ottawa, ON

- Implemented and enhanced features within a web-based dynamic form framework used by clients.
- Developed SQL queries and automation scripts for data cleanup and retrieval, contributing to production bug resolution and application deployments.

Cloud DevOps Engineer (Co-op)

May 2021 - Apr 2022

Communications Research Centre Canada | Ottawa, ON

- Designed and implemented automation and infrastructure-as-code solutions for cloud environments and disaster recovery initiatives.
- Automated AWS workflows using Step Functions and Python (Boto3), improving reliability, performance, and cost efficiency of serverless applications.

EDUCATION

Bachelor of Software Engineering

Sep 2019 - May 2024

Carleton University | Ottawa, ON

- GPA: 11.7/12 (A)
- **Honours & Awards:** Senate Medal for Academic Excellence; Dean's Honours List (2019 - 2024)

TECHNICAL SKILLS

Programming Languages: Python, Java, C#, TypeScript, JavaScript, SQL, C, PHP, Golang

Backend & ML: FastAPI, Agno, Spring Boot, Node.js, NVIDIA Triton, vLLM, Hugging Face, Model Mesh,

Cloud & DevOps: AWS, Azure, Docker, Kubernetes, Helm, GitHub Actions, CI/CD, Linux, Automated Tests

Data & Frontend: PostgreSQL, Iceberg, MongoDB, Airflow, Spark, Flink, React, Angular, HTML, CSS

PROJECTS

Built projects across full-stack, AI/ML, and concurrent programming, such as a cloud-based SaaS student scheduler tool, Spring Boot app, CNN maze solver, and multithreaded elevator simulator. Full projects: [GitHub](#)
